Susan:

The contractor for the Trustee (IKON Environmental) will be starting the immediate work on the site beginning on Monday, June 30. The immediate actions will be to remove and dispose of VB601 and VB617. They will also be profiling the various waste piles located on-site for disposal as well and disposing of what they can of the waste pile wastes to the extent of there resources.

We have not heard that they have entered into a contract with there contractor (IKON Environmental) to conduct the full cleanup as of yet. This is the plan. I will have to do some more investigation to see if this is moving forward.

Thanks
